2. Future Earth and ECR NoN Webinar Series

How does research translate into policy? Future Earth and the Early Career Network of Networks have created a webinar series about how to effectively translate scientific research into concrete policies. For more information or to register for these webinars, click [here](#).

3. Check out these 3 papers published recently by PAGES working groups:

[*Synchronization of energy consumption by human societies throughout the Holocene*](#) by Freeman et al. published in PNAS.

[*The SISAL database: a global resource to document oxygen and carbon isotope records from speleothems*](#) by Kamolphet Atsawaranunt et al. published in Earth System Science Data.

[*Interpreting historical, botanical, and geological evidence to aid preparations for future floods" in WIRES Water*](#) by Bruno Wilhelm et al. This paper is a result of the 2016 Floods cross-community workshop in Grenoble, France.

4. C-SIDE Outreach Event

6. The Early Pages Blog Update

The Early Pages turned six months old in September! Therefore, we think this is a good time to take a closer look at how it has been performing. At the moment, the blog features 6 science posts and 6 experience pieces, and it has been **read by over 1000 people in 67 countries**.

The Early Pages blog posts are listed as official [PAGES products](#) and announced on the main PAGES homepage, newsletters and our social media, where they have been generating comments and conversations. It has proven to enhance the visibility of both the scientific work and the experiences by ECRs.

Stay tuned for our upcoming posts on work-life balance, life outside academia, advice by advanced-career researchers, and exciting scientific questions such as what the 8.2 ka event looked like in the Southern Hemisphere!
